

## Cogges Link Road **does not deliver on**

### NOISE

1. **Noise** levels would **double** with CLR for the residents of Cogges.

Blakes Ave would increase by 10db from **42db to 52db**, Eton Close would rise 12db from **49db to 61db**, and Manor Rd would rise 8db from **48db to 56db**.

A 10db increase represents a doubling of noise level. 60db is equivalent to normal conversation level.

(See OCC Figure 25)

2. The **Shores Green** alternative will have **no affect on noise levels** in Cogges, nor for users of the **Witney Meadows Country Park**.

## Cogges Link Road **does not deliver on**

### AIR POLLUTION

1. The **increase in air pollution** for residents of Eton Close, Cogges is calculated to be **5%** (20 No2 to 21 No2), with no increase reported in the other two areas of Cogges.
2. The effects on **pollution levels** for users of the **Country Park** in the vicinity of the CLR are, however, **likely to be significant**, although OCC have not divulged these figures.  
(See OCC Figure 26)
3. **Shores Green** will **not affect pollution** levels in Cogges, nor for users of the **Witney Meadows Country Park**.
